

Model no. H3024

DIGITAL VERNIER CALIPER

According to

ISO 3126

The digital vernier caliper is used for the determination of out of roundness of pipes in the range of up to 1000 mm

SIMPLE AND SAFE OPERATION

- > Simple and rapid measuring of the out-of-roundness of pipes
- > Large display digits
- > Depending on size and type: delivered in a wooden box for safe storage

RELIABLE TEST RESULTS

- > High accuracy of read-out of 0.01 mm
- > Delivered with calibration certificate
- > 100% final inspection

LASTING EFFICIENCY

- > High-quality unit components guarantee high reliability, a long service life
